Foundry Management "1987" Style *(Hoyt Lecture)* 575

Y

Yamakuro, S.; Iwabuchi, Y.; Azekoshi, K; Murata, M.
Properties of 12% Cr Heat Resisting Cast Steel for Super-High Pressure and High Temperature Turbine Casing Casting 211
Yang, J.; Li, J.; Li, R.
More Powerful Inoculants for Gray Cast Iron 63
Yang, Y-M.; Peng, X.; Ding, N-X.; Mercer, J.L.; Wallace, J.F.
Influence of In-the-Mold Chamber Design on Dross Formation in Ductile Iron Castings 653
Ye, S.; Zhang, C.; Wang, J.; Cha, X.; Zhu, Y.; Zhang, J.
Preparation of Investment Shell Molds by Electrophoresis 553

Z

Zhang, C.; Ye, S.; Wang, J.; Cha, X.; Zhu, Y.; Zhang, J.
Preparation of Investment Shell Molds by Electrophoresis 553
Zhang, J.; Ye, S.; Zhang, C.; Wang, J.; Cha, X.; Zhu, Y.
Preparation of Investment Shell Molds by Electrophoresis 353
Zhang, Z.Q.; Hao, S.W.; Chen, J.Y.; Liu, P.C.
Heat Transfer at the Metal-Mold Interface of Ductile Iron 601
Zhu, Y.; Ye, S.; Zhang, C.; Wang, J.; Cha, X.; Zhang, J.
Preparation of Investment Shell Molds by Electrophoresis 553

Subject Index

A

Acoustic emission testing 47
Additives
  Organic, effect on green sand 179
  Seacoal and seacoal supplements 133
Aluminum
  Acoustic emission testing 47
  Alloy deformation 47
  Alloys 775
  Antimony contamination during modification 31
  Competitive factors in industry 643
  Controlled solidification process 373
  Degassing 73, 533, 635
  Effects of cooling rates on mechanical properties 775
  Fluidity 647
  Injection treatment for Al-Si alloys 635
  Low pressure die casting 39
  Low pressure die casting of Zn-Al alloys 813
  Measuring modification in Al-Si alloys 455
  Mold dilation and volumetric shrinkage in green and dry sand molds 259
  Molten metal pumping application 273
  Physico-chemical aspects of full mold casting 791
  Primary Si in hypereutectic Al-Si alloys 51
  Rotary impeller degassing 533
  Strontium modifiers for Al-Si alloys 233
  Supply/demand dynamics 563
Aluminum bronze castings; gating and risering 847
Automation 227, 451

B

Binders
  Binder curing of cold box foundry cores with a large scale amine/inert gas generator 333
  Ceramic shell 787
  Cold box sand mixing 99
  Ester cured alkaline phenolic resin 1
  Industrial hygiene aspects of sulfur dioxide-curing cold box binders 295
  Phenolic ester binder system 355
  Reclaimed 253
  SO_2 cold box process 621
Brass foundry sands 385, 711

C

Casting tolerances 203
Casting-over probe embedded specimen method 591
Ceramic filters 105, 629
Ceramic shell 787
Charging 451
Clay-saturated green sand 145
Cold box 333
Cold box sand mixing 99
Composite materials 723
Computer-aided
  Automatic charging of cupola melting high-alloy iron 451
  Computer-controlled green sand system 117
  Design of ductile iron castings 443
  Electric arc furnace control 493
  Geometric modeling 841
Interfacing geometric modeling package with a heat transfer simulator 841
  Least cost charging for melting 735
  Modeling of solidification and casting alloy microstructure 281
  Solidification simulation 259
  Solidification technique 15
Continuous casting of ductile iron 613
Copper-Base
  Aluminum bronze castings 847
  Brass and bronze molding sands 711
  Effect of heat treatment on the properties of Mn-Ni-Al bronze propeller alloys 537
  Gating systems 377
Coreless induction furnaces
  Electrical problems 473
  Instrument functions and interpretations 465
  Monitoring 473
Costs
  Energy cost control with electric arc furnaces 493
  Energy costs with electric arc 3
  Gating and risering 847
  Least cost charging for melting 735
  Melting costs for mains frequency induction furnaces 323
  Operational 93
Cupola, charging with manufacturing cell 451

D

Defects
  Analysis in iron 729
  Effect of fins 689
  Nitrogen contamination in green sand 875
  Nitrogen fissures and ammonical nitrogen 343
  Oxide macroinclusions in steel 187
Design
  Effect of fins 689
  In-the-mold chamber design 653
  Of ductile iron castings 443

E

Electric arc furnace energy costs 3
Electric arc furnaces 493
Emissions; EPC 503
Environmental
  Antimony toxicity considerations 883
  Brass foundry sands 385
  Controlling water problems in wet scrubber systems 351
  Evaluation of organic compounds in groundwater 693
  Furnace cooling waters 707
  Hazardous waste treatment 695
  Industrial hygiene aspects of sulfur dioxide-curing cold box binders 295
  Leachable lead 385
  Nitrogen contamination in green sand 875
  Use of foundry process solid wastes for landfill construction 483
  Water treatment 707
Evaporative pattern casting 417, 503, 579, 665
Expanded polystyrene 423

F

FRC process 621
Failure analysis 673
Fatigue fracture mechanics 673
Fatigue properties (iron) 105
Flowability, of austenitic irons 89
Fluid-impact compaction 7
Foam vaporization casting 665
Foundry wastes 483, 693, 695
Full mold casting (aluminum) 791

G

Gas-related defects 343
Gating and risering; aluminum bronze castings 847
Gating systems 435
Grinding 123

H

Hazardous waste treatment 695
High pressure molding; gray cast iron pattern equipment life 401
Hoyt Memorial Lecture 575
Hypereutectic alloys 51, 303

I

Induction furnaces, melting costs 323
Instrument interpretation 465
Investment casting 553, 749
Iron
  Austempered ductile iron 851
  Automatic charging of cupola melting high-alloy iron 451
Bainite reaction during austempering of ductile iron 411
Continuous casting 613
CuNi alloyed austempered ductile irons 171
Defect analysis 729
Dross effects 105
Dross formation 653
Dynamic fracture toughness of austempered ductile irons 127
Effect of Mn and Si on austempered ductile iron 523
Effects of copper, tin and manganese on eutectoid transformation of graphite cast irons 819
Effects of molybdenum on thermal fatigue resistance of ductile and compacted graphite irons 267
Evaporative pattern castings 579
FEM modeling and quality assessment of TIG surface remelted pattern grade cast iron 401
Fatigue properties 105
Flake graphite cast iron thermal fatigue life 217
Flow of ductile iron through ceramic filters 105
Fracture of ferritic malleable iron 515
Fracture of pearlitic malleable iron 681
Grinding practices for alloy white irons 123
Heat transfer at the metal-mold interface in ductile iron 601
Inoculants for gray cast iron 63
Microstructure, of austenitic irons 89
Modeling microstructural evolution of eutectic cast iron 139
NEM (Nonlinear estimation method) 601
Relationship between microstructure and tensile properties on austempered ductile irons 765
Relationship of fracture toughness to microstructure in ferritic DCI 757
Riserless design of ductile iron castings by computer program 443

L

Ladles 163
  Induction heated 723
  Steel ladle metallurgy 315
Lead
  Brass and bronze molding sands 711
  Leaching 711
Least cost charging 735
Loss function techniques 755
Low pressure die casting 39, 813

M-N

Macroinclusions; oxide macroinclusions in steel 187
Maintenance 93
Management; foundry management 1987 style 575
Manufacturing cell 451
Melting
  Automatic charging of cupola 451
  Costs with induction furnaces 323
  Furnaces 323, 465, 473
  Least cost charging 735
  Molten metal pumping 273
Metering 465
Microporosity 749
Microwave drying in EPC 417
NEM (Nonlinear estimation method) 601
Nitrogen; measurement in reclaimed sand inert gas infusion technique 479

O-P

Oxy-fuel burner technology 499
Pattern equipment life 401
Patternmaking
  Optimal selection and scheduling of new casting types on pattern plates 363
  Selecting tooling tolerances 203
Phenolic ester binder system 355
Polystyrene 579
Pouring; automated pouring system 163
Pouring rate 377
Pumps; molten metal pumping in foundry and foundry ingot applications 273

Q-R

Quality control
  Casting reject elimination using expert systems 617
  Off-line quality control, parameter estimation, and experimental design with the Taguchi Method 393
  Through ladle position and mold level 163
Refractories
  Ceramic shell 787
  Microwave drying of refractory coated foam patterns 417
  Preparation of shell molds by electrophoresis 553
Riserless casting 443
Robotic riser removal 339
Robots; in the steel foundry 227

S

SO_2 cold box process 621
Sand
  8–15% bentonite content green sand properties and behavior 145
  Brass and bronze molding sands 711

Computer-controlled green sand system 117
Effect of organic additives on green sand properties 179
Ester cured alkaline phenolic resin 1
Leachable lead 385
Mold dilation and volumetric shrinkage of aluminum alloys 259
Nitrogen contamination 875
Nitrogen in reclaimed systems 479
Reclaimed phenolic urethane resin-bonded sand mixtures 253
Seacoal and seacoal supplements 133
Squeeze compaction of green sand molds 7
Thermal properties of molding sands 591
Sand castings 435
Seacoal 133
Semipermanent molding 373
Silicon; refinement of hypereutectic Al-Si alloys 303
Silver Anniversary Paper; aluminum 647
Silver Anniversary Paper; foam 665
Solidification
Al-Si hypereutectic alloys 51
Computer-aided 15
Computer-aided simulation of aluminun alloys 259
Controlled solidification process 373
Geometric modeling 25, 281, 841
Geometric modeling of directional solidification 25
Hypereutectic Al-Si alloys 51
Modeling microstructural evolution of eutectic cast iron 139
Special irons; grinding practices for alloy white irons 123
Steel
Austenitic manganese with nickel 745
Automation in the steel foundry 227
Bainite reaction during austempering of high silicon cast steel 411
Ceramic foam filters 629
Coke formation 629
Induction heated ladles 723
Ladle metallurgy 315
Loss function techniques 755
Oxide macroinclusions 187
Process metallurgy 431, 699
Properties of 12% Cr heat resisting cast steel 211
Suitable for glass coating 241

T

Taguchi Method 393
Tensile strength, of binders 99
Testing
Al alloys by acoustic emission 47
Computer-controlled green sand system 117
Non-destructive testing of modification in Al-Si alloys by electrical conductivity 455
Tooling; EPS pattern tooling 423
Tungsten inert gas arc process 401

W

Water
Furnace cooling water 707
Problems in wet scrubber systems 351
Wet scrubber systems 351
